

drupal-with-nginx: D7 – Mime Types

The mime.types file in the drupal-with nginx repository is modified from the original mime.types file supplied by nginx. Comparisons were made to the mime.types file taken from the Debian Wheezy nginx package and Perusio's D7 branch mime.types file. This document describes the changes made. Mime types shared by both files are **not** included in this document.

For further information about the handling of mime types in nginx, see http://wiki.nginx.org/HttpCoreModule#default_type and <http://wiki.nginx.org/HttpCoreModule#types>.
